

Easycare 8

simple but sophisticated mattress system

Med Therapeutics
Therapeutic Surface Systems

Med Therapeutics was created in 2018 by Dr Henning Lorenz – one of the founding fathers of two of the largest Therapeutic Support Surface providers in the world.

Using his many years of expertise in pressure area care, his knowledge of Therapeutic Support Surfaces & Mechanical (Dynamic) Therapy Systems, and his grasp of the technical requirements for this rapidly evolving field, he took much of his management, sales, technical and manufacturing team with him to set up a company that would lead the way in clinical excellence. It would become synonymous with the advance of telemedicine, remote fault diagnosis, remote pressure mapping and more importantly, proactive pressure reduction – the ability to take pressure to zero instantly when required.

Med Therapeutics is best placed to provide true clinical solutions to ITU / ICU critical situations, aged care providers, and community loan store providers across the world. Whether the problem be geriatric, bariatric, paediatric, intensive care and general wards, our years of experience, our deep understanding of the technical requirements and also our passion and commitment for tissue viability care means that we WILL have an answer for your patient.

With an office near Brighton, England, an office in Karlsruhe, Germany and an office in Taipei, Taiwan we have the world covered.

We have care covered.

EasyCARE 8 replacement mattress system

The Easycare 8 mattress system is a deep cell therapy replacement mattress system that allows the patient to immerse deeply into the cell without bottoming out. It features cell in cell so that in case of power outage there is a 2" air cushion that will protect the patient. The Easycare range uses a single multi-functionality pump - operating at different pressures depending on chosen mode for cushion, overlay, 7" replacement and 8" replacement. This means that an entire clinical environment can be run using just one pump across a variety of support surfaces. Indicated for high risk patients, this system has a huge range of features and benefits, making it more than a match in comparison with far more expensive systems.

Product Benefits (Mattress)

- 8" deep cell replacement mattress for lower pressure immersion therapy
- 20 replaceable cells
- 1 in 2 cell cycle
- CPR
- 2 way stretch waterproof vapour permeable zipped cover
- Fully launderable
- 200cm x 90cm x 20cm
- Patients up to 180kg

Product Benefits (Pump)

- Weight setting up to 180kg
- Intelligent pressure sensing for optimum interface pressure
- Almost silent operation
- LCD screen
- Panel lock
- Low pressure and power failure alarms
- Multi-functionality- one pump operates at different pressures depending on chosen mode for: cushion, overlay, 7" replacement & 8" replacement
- Static & dynamic modes
- Stylish & intuitive design
- Automatically switches off when the optimum internal pressure is reached
- Mechanical (or Dynamic) Therapy loading & offloading fully allows perfusion and thus reactive hyperemia

Features

Standard Connectors

Rapid CPR Label

Technical Specifications

Dimensions and weight

Mattress - 8" Replacement:

200cm x 90cm x 20cm

EC8 Pump:

29.5cm x 15cm x 12.2cm. 2kg

Power

Power input: 220v-240v AC

Material

Mattresses: Nylon/PU. Latex free.

Max user capacity

180kg
